Subject: Fwd: Analysis of Senate File 0126

Hi Sandie,

I wanted to let you know that I am planning to be away from the office (and phones and email) from February 5th to the 15th, and ask if you would be willing to contact others in my organization, Richard Garrett and Lisa McGee (cc'd above), in the event EPA prepares an analysis or information pertaining to SF 126 that you would feel comfortable sharing. Richard is our lobbyist in Cheyenne, and Lisa is our program director, based in Jackson. Both are following this bill closely.

Please let me know if this would work for you.

Thank you,

Dan

A UAA is not required for the first subsection (i), only the second subsection (ii).

(i) Develop water quality standards for surface waters where hydrologic modification resulting from the exercise of valid water rights alter the attainment of existing water quality standards;

(ii) Prepare a schedule to develop appropriate water quality standards based on the completion of a use attainability analysis for any waters that have been identified pursuant to 33 U.S.C. § 1315(b) where dams, diversions or other types of hydrologic modification alter the attainment of any existing water quality standard.
